

CostSmart's Services: **Custom eStore Solution**

Our custom eStore solution has been designed to simplify and streamline your company's ordering and purchasing. Under your guidance, we create a dedicated brand responsive eStore that is unique to your company. The eStore's functionality allows you to place orders 24/7 from any device, presents your products with images, descriptions, current stock levels, and provides a full order history. The system enables management to allocate unique logins to users using an email and password.

CostSmart also offer a fully integrated eStore that allows you to sell directly to your customers. This solution can fit within your current website or be a standalone option depending on your needs.

- Designed for ease of use
- Collect payment for your products
- Custom order criteria fields
- On-screen and email order confirmation
- Order history function
- Set default delivery and invoices address or alter and add new addresses to each order

“ Our customers have been using the CostSmart eStore solution for over 5 years and we don't know a better solution that exists for mobile phone, tablet or desktop applications.

- Administration Manager - Christian School Sports Association

”

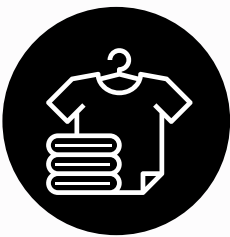

Head to our website to learn more about how your business can benefit from our **Custom eStore Solution**

Custom eStore Solution

“*A fully responsive ordering system designed to make stocking and receiving your items a breeze.*”

CostSmart creates a dedicated, **branded, responsive eStore** that is unique to your company.

Product catalogues can be configured so each unique login can only view categories that are relevant to their roles in the business.

CostSmart can supply you with **customised reporting** of any type.

In addition to our internal customised eStore solution, we offer an **integrated eStore** that allows you to sell directly to your customers.
