

# CostSmart's Services:

## Our C-Code Method

Are internal cost pressures restricting your purchasing power? In almost all cases, purchasing x 1000 products, rather than x 100, significantly reduces the unit cost. Sometimes it can provide more than a 70% saving.

At CostSmart we have developed a unique service offering for our clients called "C-Code Products" to ensure costs are at a minimum and products are readily available for when you need them. If internal budgets are restricting purchasing power, we will make the bulk purchase on your behalf, **store** your products and distribute them as needed. We will only invoice for the goods as the business unit requires them.

Through bulk purchasing, we can acquire products significantly cheaper, which allows you to have your stock **stored and distributed** when you require it. CostSmart house the products indefinitely as "C-Code Products" and make them available for you to draw upon in your own **customised eStore**. Ultimately, this results in lower per-unit cost and immediate access to inventory without affecting your internal budget.

**“** *This model has helped us ensure that our products are in stock when we need them and to allocate costs correctly across our National business units.*

# Our C-Code Method

“We help with your cash flow and cost allocation accuracy.

We combine purchasing volumes to achieve **greater supply chain efficiencies** which gives you the ability to order small quantities at lower costs.

Save time and cut costs in procurement, administration and warehousing by allowing us to **source, procure, store and distribute** your collateral.

Purchasing higher volumes of products can sometimes provide more than a **70% saving**.

Our customisable **eStore Solution** allows you to draw on stock 24/7 and offers live inventory information.
